"Proteolysis of SNAP-25 by types E and A botulinal neurotoxins.";

J. BIOL. CHEM. 269:1617-1620(1994).

J. BIOL. CHEM. 269:1617-1620(1994).

-!- FUNCTION: BOTULINUS TOXIN ACTS BY INHIBITING NEUROTRANSMITTER

RELEASE. IT BINDS TO PERIPHERAL NEURONAL SYNAPSES, IS INTERNALIZED

AND MOVES BY RETROGRADE TRANSPORT UP THE AXON INTO THE SPINAL CORD
WHERE IT CAN MOVE BETWEEN POSTSYNAPTIC AND PRESINAPTIC NEURONS. IT
INHIBITS NEUROTRANSMITTER RELEASE BY ACTING AS A ZINC
ENDOPPRIDASE. IT CATALTZES THE HYDROLYSIS OF THE 197-GLN-|-ARG-
198 BOND IN SNAP-25.

-!- SUBUNIT: DISULFIDE-LINKED HETERODIMER OF A LIGHT CHAIN (L) AND A
A HEAVY CHAIN (H). THE LIGHT CHAIN HAS THE PHARMACOLOGICAL
ACTIVITY, WHILE THE N- AND C-TERMINAL OF THE HEAVY CHAIN MEDIATE
CHANNEL FORMATION AND TOXIN BINDING, RESPECTIVELY.

-!- SUBCELLULAR LOCATION: SECRETED.

-!- THERE ARE SEVEN ANTIGENICALLY DISTINCT FORMS OF BOTULINUM
NEUROTOXIN: TYPES A, B, Cl, D, E, F, AND G.

-!- THERE ARE SEVEN ANTIGENICALLY DISTINCT FORMS OF BOTULINUM
NEUROTOXIN: TYPES A, B, Cl, D, E, F, AND G.

-!- SIMILARITY: BELONGS TO PEPTIDASE FAMILY M27 (ZINC
METALLOPPROTEASE); ALSO KNOWN AS THE TETANUS/BOTULINUM
SUPPLY METALLOPPROTEASE); ALSO KNOWN AS THE TETANUS/BOTULINUM
                                                                                                                                                                                                                                                                                                                                                                                                                                                                               This SWISS-PROT entry is copyright. !- SUBUNIT: DISULFIDE-LINKED HETERODIMER OF A LIGHT CHAN A HEAVY CHAIN (H). THE LIGHT CHAIN HAS THE PHARMACOL ACTIVITY, WHILE THE N- AND C-TERMINAL OF THE HEAVY CHANNEL FORMATION AND TOXIN BINDING, RESPECTIVELY.

!- SUBCELLULAR LOCATION: SECRETED.

!- THERE ARE SEVEN ANTIGENICALLY DISTINCT FORMS OF BOTU NEUROTOXIN: TYPES A, B, C1, D, E, F, AND G.

!- SIMILARITY: BELONGS TO PEPTIDASE FAMILY M27 (ZINC METALLOPROTEASE); ALSO KNOWN AS THE TETANUS/BOTULINU
                                                                                                                                                                                                                                                                                                                                                                                                                          HYDROLASE; METALLOPROTEASE;

-!- FUNCTION: BOTULINUS TOXIN ACTS BY INHIBITING NEUROTRANSMITTER

RELEASE. IT BINDS TO PERIPHERAL NEURONAL SYNAPSES, IS INTERNALIZED

AND MOVES BY RETROGRADE TRANSPORT UP THE AXON INTO THE SPINAL CORD

WHERE IT CAN MOVE BETWEEN POSTSYNAPTIC AND PRESYNAPTIC NEURONS. IT

INHIBITS NEUROTRANSMITTER RELEASE BY ACTING AS A ZINC

ENDOPEPTIDASE.

ENDOPEPTIDASE.

"The complete sequence of four major structural proteins of
horse sickness virus serotype 6: evolutionary relationships
and between the orbiviruses.";
VIRUS RES. 53:53-73(1998).

-!- FUNCTION: THE VP2 PROTEIN IS ONE OF THE TWO PROTEINS (WI
WHICH CONSTITUTE THE VIRUS PARTICLE OUTER CAPSID. IT IS
MAJOR TARGET OF THE HOST IMMUNOGENIC RESPONSE.

-!- SIMILARITY: BELONGS TO THE THE REOVIRUSES VP2 FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                    Length 1051;

-!- FUNCTION: BOTULINUS TOXIN ACTS BY INHIBITING NEUROTRANSMITTER

RELEASE. IT BINDS TO PERFUBERAL NEURONAL SYNAPSES, IS INTERNALIZED

AND MOVES BY RETROGRADE TRANSPORT UP THE AXON INTO THE SPINAL CORD

WHERE IT CAN MOVE BETWEEN POSTSYNAPTIC AND PRESYNAPTIC NEURONS. IT

INHIBITS NEUROTRANSMITTER RELEASE BY ACTING AS A ZINC

ENDOPEPTIDASE THAT CLEAVES SYNTAXIN.

C. SUBUNIT: DISULFIDE-LINKED HETERODIMER OF A LIGHT CHAIN (L.) AND A

A HEAVY CHAIN (H.). THE LIGHT CHAIN HAS THE PHARMACOLOGICAL

A CTIVITY, WHILE THE N- AND C-TERMINAL OF THE HEAVY CHAIN MEDIATE

C. SUBCELLULAR LOCATION: SECRETED.

INHIBITS NEUROTRANSMITTER RELEASE BY ACTING AS A ZINC ENDOPEPTIDASE THAT CLEAVES THE 60-LYS-|-LEU-61 BOND OF SYNAPTOBREVINS-1 AND -2.

SYNAPTOBREVINS-1 AND -2.

SUBUNIT: DISULFIDE-LINKED HETERODIMER OF A LIGHT CHAIN (L) AND A HEAVY CHAIN (H). THE LIGHT CHAIN HAS THE PHARMACOLOGICAL ACTIVITY, WHILE THE N- AND C-TERMINAL OF THE HEAVY CHAIN MEDIATE CHANNEL FORMATION AND TOXIN BINDING, RESPECTIVELY.

-!- SUBCELLULAR LOCATION: SECRETED.

-!- THERE ARE SEVEN ANTIGENICALLY DISTINCT FORMS OF BOTULINUM NEUROTOXIN: TYPES A, B, Cl, D, E, F, AND G.

-!- BOTULINUM TYPE D NEUROTOXIN IS SYNTHESIZED BY D STRAIN OF CLOSTRIDIUM BOTULINUM WHICH CARRY THE APPROPRIATE BACTERIOPHAGE.

-!- SIMILARITY: BELONGS TO PEPTIDASE FAMILY M27 (ZINC METALLOPROTEASE); ALSO KNOWN AS THE TETANUS/BOTULINUM NEUROTOXIN
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                1;
                                                                                                                                                                                                                                                                                                                                                                                 BOTULINUM NEUROTOXIN D, LIGHT-CHAIN.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Ω.
                                                                                                                                                                                                                                                                 COND
                                                                                                                                                                                        Sequence 1, Application US/07610525
Patent No. 5196512
GENERAL INFORMATION:
APPLICANT: BIANCHI Eisabetta
APPLICANT: DESSI Antonello
APPLICANT: CORRADIN Giampietro
TITLE OF INVENTION: SYNTHETIC PEPTIDES USEFUL AS
TITLE OF INVENTION: UNIVERSAL CARRIERS FOR THE PREPARATION OF IMMUNOGENIC OTITLE OF INVENTION: AND THEIR USE IN THE DEVELOPMENT OF SYNTHETIC VACCINES.
NUMBER OF SEQUENCES: 7
CORRESPONDENCE ADDRESS:
ADDRESSEE: SHEA & GOULD
STREET: 1251 AVENUE OF THE AMERICAS
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Ö
